

May 29, 2007

My name is Jenny Morales and I have been attending CT for almost three years. My experience here has been wonderful, because it is a school where everyone is treated the same and there are no favorites or better students. What I enjoyed about CT was giving other students labor hours. It was hard being in Government Group, but it was also fun. Some people say that CT is not a high school and that it sucks. It is not true. Teachers at CT are always helping their students one way or another and making sure their students come to school and do thier work. I believe that those kind of teachers are the real ones, not the ones they say to be. I will miss this school and I will always appreciate Doug, Caryn, and Steve for their concern. And especially Doug for helping me get my high school degree. Without him I would have never achieved being a graduate from CT.
