

Successful school districts have leadership emanating from many people....leadership that mandates and supports learning for all students as well as learning for staff. As your Superintendent this year, I am fortunate to be working with students, staff, parents, and community people who value education and want to assure the success of every child. I am very proud to be here and do not believe there is better work to do than being a part of this community.

Our challenge is to provide each student with a comprehensive education that prepares them to go into a career path or post secondary education. Education must be a journey based on individual strengths and needs. As a district, we have an obligation to provide “whatever it takes” to ensure the success of our students. Our teachers are constantly researching strategies and programs to help our students master the standards in each content area. We continue to have high expectations for our students and ourselves.

It is important that every adult in our school district and community be a role model for our students. Lifelong learning will allow our graduates to continue to give back to the community that educated them. I invite you to visit our schools anytime and I welcome your feedback so we can continue to improve our education system.
